Competition Rules

High school and university students from all over the world can participate in the competition.

Each student can participate in the competition with only one project, and each project is prepared by a maximum of two students.

Only one advisor can participate in each project. On the other hand, an advisor can participate in as many projects as he/she likes. It is not compulsory to have an advisor in the project.

Projects which have participated in or applied to any project competition, under the same or a different name and/or with the same or similar content (subject), before the application deadline of this competition, can also participate in this competition.

Projects not conforming to the above-stated conditions will not be accepted to the competition.

APPLICATION PROCESS:

If needed, the project application area can be changed by the jury.

Projects which have passed the pre-assessment criteria will be invited to be presented in the exhibition to take place on June 12, 13 and 14.

The students who have prepared these projects will be interviewed by the jury during the exhibition.

In the Final Competition, projects will be re-evaluated by specialist juries according to the criteria mentioned above. In each area, students who win a degree will receive a monetary award and certificate of achievement.

If the students participating in the competition as a team, are invited to the final exhibitions, it is obligatory that both students are present in the exhibition and presentation. Otherwise, both students will be eliminated from the competition.

If the students participating in the competition as a team, are invited to the final exhibitions, it is obligatory that both students are present in the exhibition and presentation. Otherwise, both students will be eliminated from the competition.

If, after the competition, any violation of the rule is found, the above-mentioned sanctions will apply.

During the competition, you need to regularly check your e-mail account registered in the system.

For projects that are considered to be of commercial value, it is recommended to make patent application before the exhibition. Information about this can be obtained from www.turkpatent.gov.tr. Scientific evaluation of the applied projects is performed within the framework of the above-mentioned rules and principles. No objection, other than the judicial one, will be accepted with regard to the results of the evaluations.
